CERTIFICATE

This is to certify that **Mr. Prajapati Kashyap Sanjaybhai** and **Mr. Mistry Dhruvil Prakashbhai** of Faculty of Management and Information Science, Dharamsinh Desai University as part of their Bachelor of Computer Application (BCA) VIth Semester, have done their Project Work on "**Online Travel Agency System**" at **Skynet Global Systems** under my guidance.

This Project Work was carried out from 4th December, 2023 to 23rd March, 2024 as partial fulfilment for the award of degree of Bachelor of Computer Application.

Prof. Kinjal U. Acharya
(Internal Guide)

Prof. C P Patel
(HOD, BCA Dept.)

Acknowledgment

We extend our heartfelt gratitude to **Prof. C.P. Patel**, the esteemed **Head of the BCA Department**, for his exceptional leadership, unwavering support, and invaluable guidance throughout our project journey. His vision and mentorship have been instrumental in shaping our success, and we are honored to have had the opportunity to learn from him.

A special acknowledgment goes to **Mrs. Shruti Thakkar**, our esteemed external guide and Director of **Skynet Global Systems**, a renowned technology company known for its innovative solutions and industry leadership. Mrs. Shruti Thakkar's expertise, continuous encouragement, and invaluable insights have significantly enriched our project's development. Her dedication to excellence and commitment to fostering talent have inspired us immensely.

We also express our deepest appreciation to **Prof. Kinjal U. Acharya**, our esteemed internal guide, for her insightful feedback, dedication, and unwavering commitment to our project's excellence. Her guidance has been a cornerstone of our achievement, and her mentorship has inspired us to strive for excellence in every aspect of our work. Prof. Kinjal Acharya's passion for education and dedication to her students have made a lasting impact on our professional development.

Furthermore, we are grateful for the collaborative spirit and contributions of all our project partners, whose collective efforts and innovative ideas have propelled our project towards success. Their commitment to teamwork and excellence has been truly commendable.

To all our mentors, colleagues, and supporters who have believed in us and contributed to our journey, we extend our sincere thanks. Your encouragement, wisdom, and support have been invaluable in shaping our success story.

Warm regards,

Prajapati Kashyap

(21BCUBS030)

Mistry Dhruvil

About The System

1.1 PROJECT PROFILE- KD Travels

Project Title	Online Travel Agency (OTA)
Organization	Skynet Global Systems
Design Tool	Figma
Frontend Tool	React.Js(JavaScript Library)
Backend Tool	Node.js, Express.js, MongoDB
Api Testing Tool	Postman
Documentation Tool	Microsoft word 2023
Project Guide	Mrs. Shruti Thakar
Project Duration	4/12/2023 to 23/3/2024
Team Members	Prajapati Kashyap S.(21bcubs030) Mistry Dhruvil P.(21bcubs034)

1.2. ABOUT THE APPLICATION

OTA (Online Travel Agency)

PROJECT DEFINITION— Online Travel Agency for Customer & Admin.
(KD Travelers)

The purpose of this Web application is to provide a platform where customer Browse the different-different Travel Packages, Book hotels as well as book there Flights according to their budget & time.

The most valuable thing for human being is Time & Budget.

The KD Travelers is an online web-application designed to save our precious time by designing a web-App for Customer. The users can register themselves on the application and can select their preferred things from the different Travel Packages, hotels & Flights.

1.3. Purpose of KD Travels: -

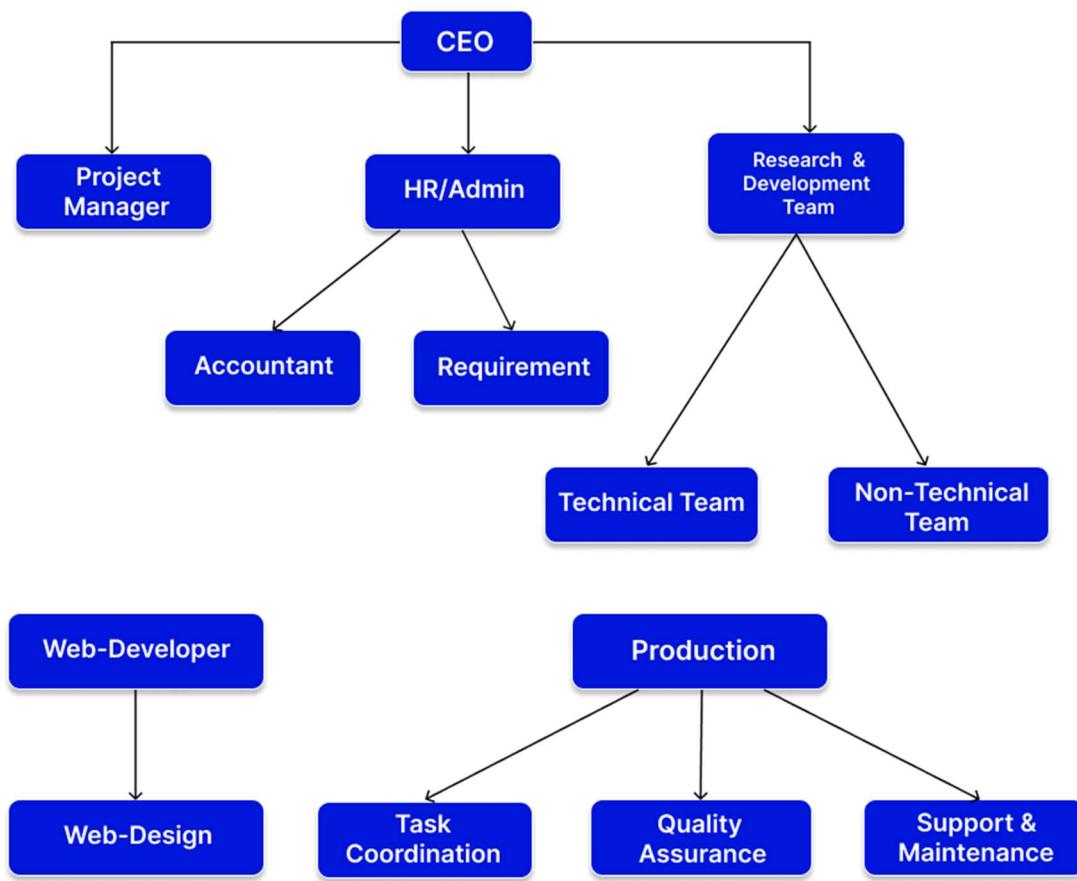

Facilitate Transactions: The primary purpose is to enable users to browse Flight, Hotel, Holiday Packages and Book them with affordable price & complete transactions online.

Chapter.2

ORGANIZATION

OVERVIEW

- We Skynet Global Systems is a technology provider of any business from start to top-notch come inside to see how we work and how we help Businesses around the globe. Come close to see our hard-working team and result oriented approach. To envision how your project will be handled. Check for our services and our wok strategy.
- We are providing various IT services across globe, which makes your business effortless.
- We are specialized in various technical development rom crafting latest web Application, Mobile Application, Software Application, ERP to extending services like Database Analysis, API, Maintenance, Testing, Cloud Services and much more.
- We provide result-oriented solution to our client and ensure quality every time. We always understand our client's business first and after we proceed further.
- Our team provides an exact output as discussed. Our goal is to provide satisfying service at any time.

Our Core Competency are mentioned in below.

- E commerce Development
- Mobile Application Development
- UI/UX Design
- Cloud & External Services
- Complete Business Solution / ERP
- Responsive website Design & Development.
- B2B / B2C / C

Chapter.3

Hardware

and Software

Configurations

▪ **Development:**

Processor: intel core i5

Processor Speed: 2.40 GHz to 4.20 GHz

Hard Disk / SSD: 512GB SSD

RAM: 8GB

▪ **Implementation (Visual Studio Code):**

Version: 1.86.1

RAM: 8GB

Storage: 512GB

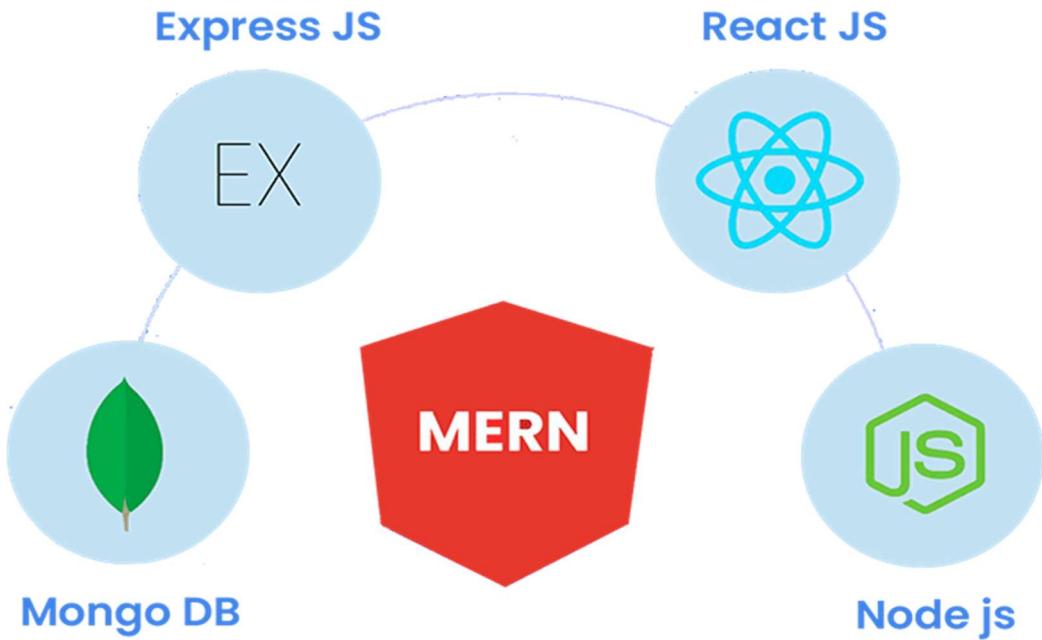

▪ **Software Requirements**

- Vite + React
- MongoDB (Version: "5.0.8")
- Express JS (Version: ^4.18.2)
- Node JS (Version: “v16.15.0”)
- Git (Version: “git version 2.36.1. windows.1”)
- GitHub

Chapter.4

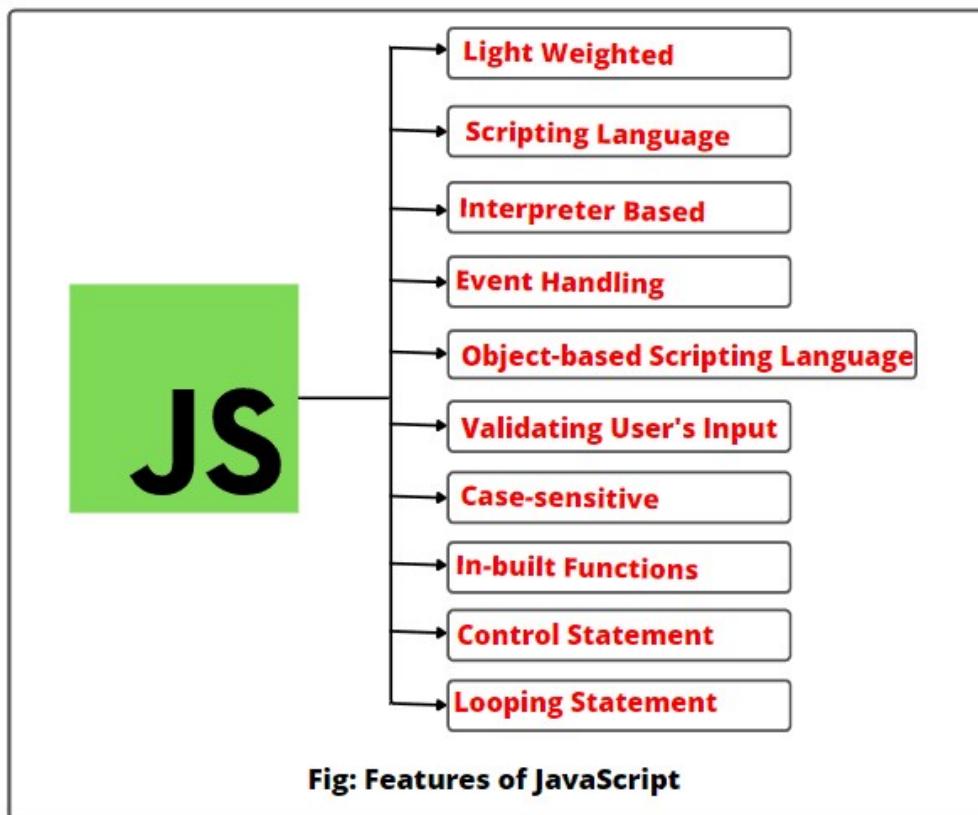

Features of tool used

To create OTA (Online Travel Agency) system we use MERN stack Technology which is combination of Frontend Technology as well as Backend Technology. These Technology use core base on the JavaScript as a Programming Language. So here is the details given below

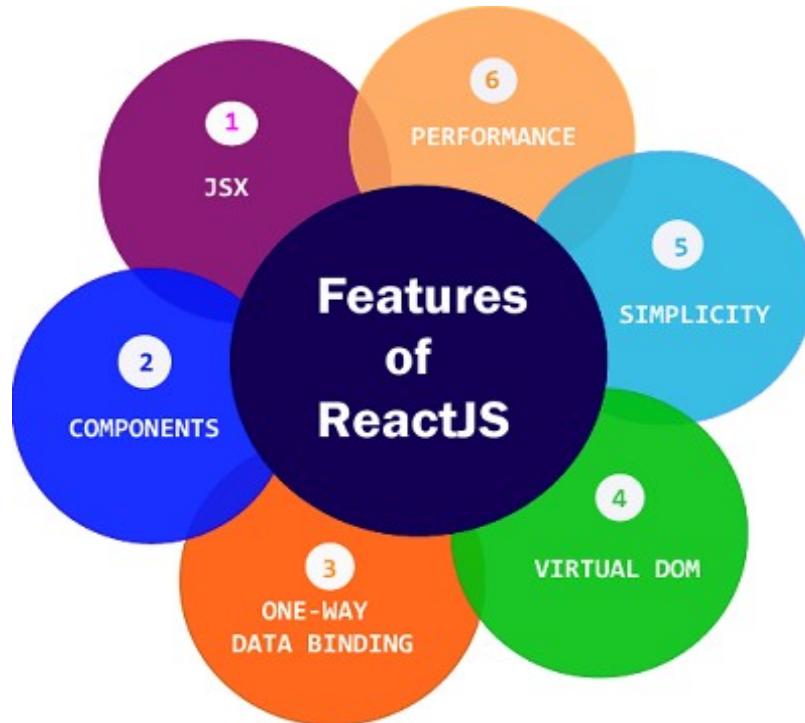

JavaScript

JavaScript is the Programming Language of our project. JavaScript, created by Brendan Eich in 1995, emerged as a dynamic scripting language for Netscape Navigator. Originally named Mocha, then LiveScript, it later adopted the name JavaScript to capitalize on Java's popularity. Standardization led to the ECMAScript specification in 1997. The late 1990s saw browser wars between Netscape and Internet Explorer, impacting JavaScript's development. AJAX's introduction in the early 2000s revolutionized web applications by enabling asynchronous server communication. The 2010s marked a significant shift with the rise of JavaScript frameworks like jQuery, Angular, React, and Vue.js. Node.js, introduced in 2009, expanded JavaScript to server-side development. ECMAScript 2015 (ES6) brought major language improvements, and subsequent yearly updates introduced additional features. JavaScript's versatility expanded with the advent of single-page applications (SPAs), dominating modern web development. Today, JavaScript is a ubiquitous language, powering client-side, server-side, mobile, and desktop applications, with a thriving community contributing to its ongoing evolution. Now the below image is feature provide by JavaScript:

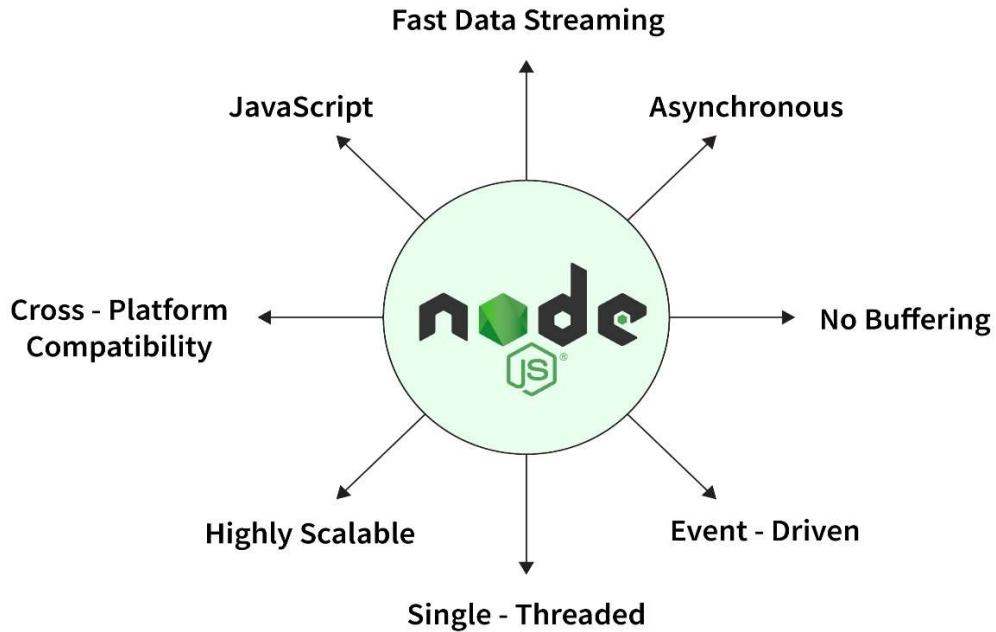

ReactJs (JavaScript Library)—Frontend Technology

React.js is an open-source JavaScript library developed by Facebook for building user interfaces. It is widely used for creating interactive and efficient front-end applications. React simplifies the process of UI development through its component-based architecture and the use of a virtual DOM, allowing for optimized rendering. Since its introduction in 2013, React has seen significant adoption due to its declarative syntax and efficient rendering, making it a cornerstone for modern web development. ReactJS still used the same traditional data flow, but it is not directly operating on the browser's Document Object Model (DOM) immediately; instead, it operates on a virtual DOM. It means rather than manipulating the document in a browser after changes to our data, it resolves changes on a DOM built and run entirely in memory. After the virtual DOM has been updated, React determines what changes made to the actual browser's DOM. The React Virtual DOM exists entirely in memory and is a representation of the web browser's DOM. Due to this, when we write a React component, we did not write directly to the DOM; instead, we are writing virtual components that react will turn into the DOM. Now the below image for React Features:

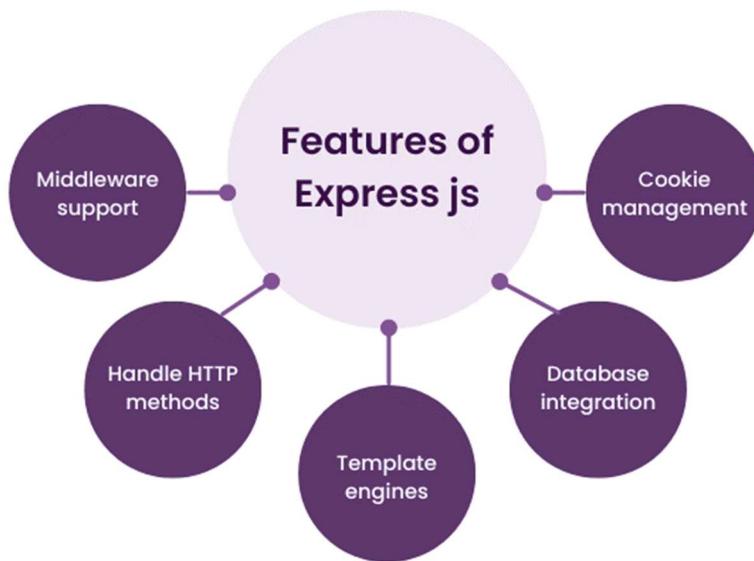

NodeJS- (JavaScript Runtime)

Node.js is a server-side JavaScript runtime built on the V8 JavaScript engine. It allows developers to execute JavaScript code outside of a web browser, enabling the development of scalable and efficient server-side applications. Introduced in 2009, Node.js has revolutionized server-side programming with its non-blocking I/O and event-driven architecture, making it well-suited for handling concurrent requests. Its package manager, npm, has become a central hub for sharing and managing JavaScript libraries. Over the years, Node.js has experienced widespread adoption, powering a variety of applications, including APIs, microservices, and real-time applications. Its continued development and active community contribute to its status as a key technology in modern web development. NodeJS Features Image:

ExpressJS

Express.js is a minimalistic and flexible Node.js web application framework that simplifies the development of robust and scalable server-side applications. Introduced in 2010, Express.js provides a set of features for building web and mobile applications, including routing, middleware support, and template engines. It has become a popular choice due to its simplicity and extensibility, enabling developers to create APIs and web applications efficiently. Over the years, Express.js has evolved with regular updates, maintaining its lightweight design while adapting to modern development needs. Its widespread adoption and active community support contribute to its continued relevance as a go-to framework for Node.js applications. It handles 10760 requests/second.

MongoDB

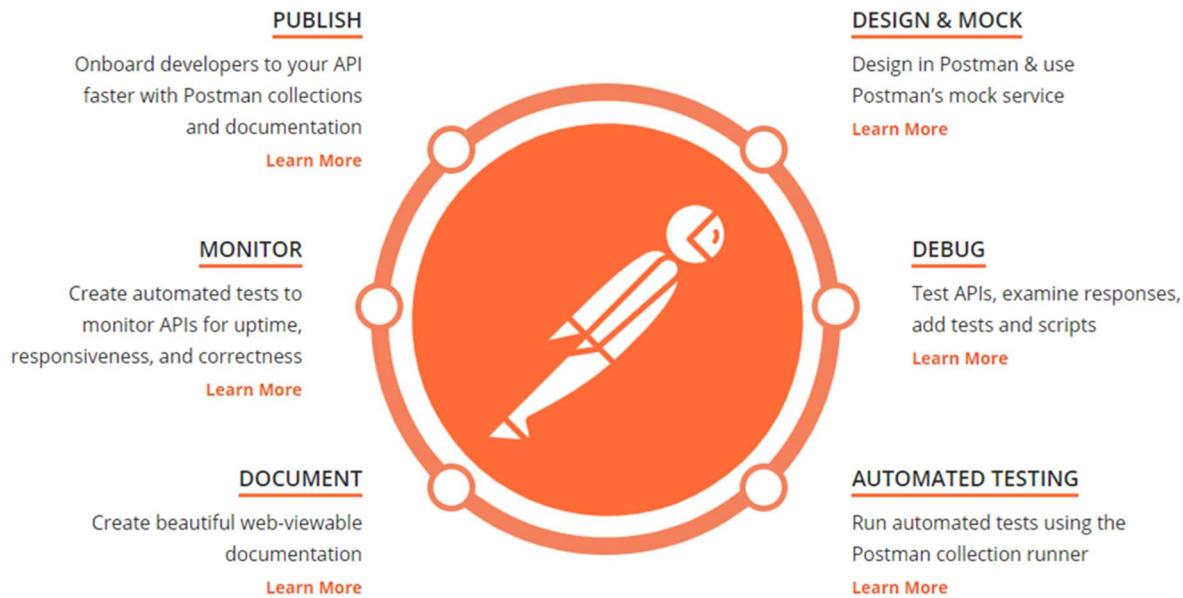

MongoDB is a NoSQL database management system that stores data in a flexible, JSON-like format called BSON. It is designed for scalability, handling large amounts of data with ease. Introduced in 2009, MongoDB is known for its schema-less design, allowing developers to work with dynamic and evolving data structures. Over the years, MongoDB has gained popularity for its ability to handle diverse data types and support horizontal scaling. Its document-oriented model and rich query language make it suitable for a variety of applications, including those requiring real-time data. MongoDB's development has been marked by regular updates, community engagement, and a growing ecosystem, solidifying its position as a prominent NoSQL database solution.

API Testing Tool POSTMAN

Postman Tools Support Every Stage of the API Lifecycle

Through design, testing and full production, Postman is there for faster, easier API development—without the chaos.

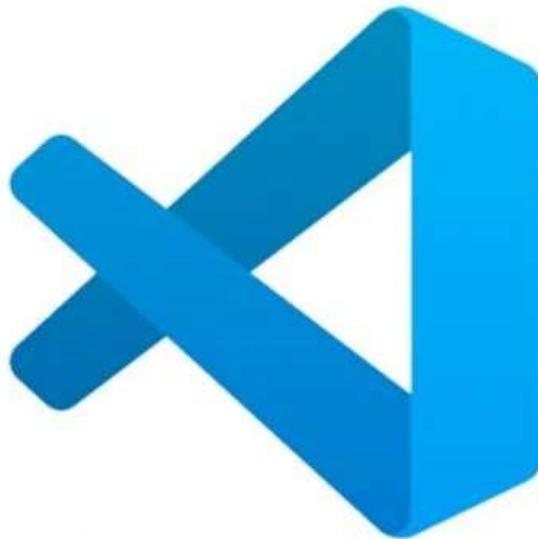

Postman is a pivotal API development tool, offering a streamlined approach to testing, documenting, and sharing APIs. Its user-friendly interface and robust features, such as environment variables and test scripts, enhance developer productivity and collaboration. Postman simplifies API testing workflows, ensuring the reliability and consistency of APIs. With its collection sharing and version control capabilities, Postman facilitates seamless collaboration among team members. Widely adopted by developers across industries, Postman has become an indispensable tool for building reliable and efficient APIs in modern web development.

Design Tool Figma

Figma is a powerful collaborative design tool used by designers, developers, and product teams to create, prototype, and collaborate on user interfaces (UIs) and user experiences (UX). Its cloud-based platform enables real-time collaboration, allowing multiple users to work on the same design project simultaneously. Figma's intuitive interface and robust set of features, including vector editing tools, prototyping capabilities, and design system management, make it a preferred choice for design teams. With Figma, designers can create responsive designs, interactive prototypes, and design systems efficiently. Its version history and commenting features streamline the design review process, fostering effective communication and iteration. As a result, Figma has become an essential tool for designing modern digital products and experiences.

Code Editor Visual Studio Code

Visual Studio Code

Visual Studio Code (VS Code) is a free, cross-platform code editor developed by Microsoft. It supports various programming languages and offers features like integrated terminal, Git support, debugging, and intelligent code completion. VS Code's extension system allows customization and expansion of functionality. With a focus on simplicity and performance, it provides a versatile environment for coding, task automation, and version control. Its popularity stems from a vibrant extension ecosystem, themes, and collaboration features like Live Share. VS Code strikes a balance between a lightweight editor and a feature-rich integrated development environment (IDE), making it a preferred choice for developers.

SMTP Server

SMTP (Simple Mail Transfer Protocol) is a standard protocol used for sending emails over the internet. It is a text-based protocol that defines how email clients and servers communicate with each other to send and relay email messages. Here's a more detailed explanation of SMTP servers:

- Functionality: SMTP servers are responsible for sending outgoing emails from an email client (such as Gmail, Outlook, or Thunderbird) to the recipient's email server. When you compose and send an email, your email client communicates with an SMTP server to deliver the message.
- Authentication: SMTP servers often require authentication to prevent unauthorized use. Authentication involves providing a username and password to the SMTP server to verify that you are an authorized user. This prevents spammers from abusing the server to send spam emails.

Chapter.5

Detailed Description of the system

5.a Existing System

Before the development of our OTA (Online Travel Agency) system, the online travel industry primarily consisted of single-vendor platforms. Users often had to navigate through multiple websites to book flights, hotels, and holiday packages separately. This fragmented approach led to inefficiencies and inconvenience for users, as well as limitations for vendors in reaching a wider audience.

5.b Proposed System

Our OTA system aims to address the limitations of the existing system by providing a comprehensive platform for booking flights, hotels, and holiday packages in a unified manner. The proposed system offers the following key features and benefits:

Flight Booking Module:

Users can input their flight preferences such as departure, destination, date, seat preference, and flight class through a user-friendly form.

The system sends this data to an API, which returns relevant flight options including details like origin, destination, flight class, and price.

After selecting a flight, registered users can preview their booking details and proceed to payment. Non-registered users are directed to the registration or login page.

Upon successful payment, the booking details are stored in the database and a confirmation email is sent to the user.

Hotel Booking Module:

Users can search for hotels by specifying criteria such as city, check-in/out dates, number of adults/children, and room preferences.

The system sends this information to an API, which returns a list of available hotels along with details like hotel image, name, city, rating, services, and price.

Similar to the flight booking process, users can preview their hotel booking details, proceed to payment, and receive a confirmation email upon successful booking.

Holiday Booking Module:

Users can browse and book holiday packages by selecting a destination city and month of travel.

The system interacts with an API to fetch holiday packages based on the user's preferences, providing details such as holiday image, name, city, seller, services, and price.

As with flight and hotel bookings, users can review their holiday booking details, complete the payment process, and receive a confirmation email.

User Registration and Login:

Users can register on the platform by providing their full name, email, password, and mobile number via a registration form.

The registration data is sent to the API for processing, and users receive appropriate feedback messages.

Registered users can log in using their email and password, with the system verifying their credentials against the API.

Upon successful login, users are redirected to the home page of the OTA platform.

Admin Functionality:

Admins can access the system using special login credentials.

Once logged in, admins have the ability to perform CRUD (Create, Read, Update, Delete) operations on flight, hotel, and holiday data.

Additionally, admins can view data related to registered users and booked flights, hotels, and holidays for monitoring and management purposes.

6.(b) Feasibility Study

Feasibility encompasses determining whether our application can be successfully developed and implemented. We conducted three types of feasibility studies: technical, economic, and operational. These evaluations ensure that our team has the necessary skills and resources, that the project aligns with budget constraints and offers a promising return on investment, and that the application can seamlessly integrate into existing workflows and systems.

- **Types of feasibility**

1. **Technical Feasibility**
2. **Economical Feasibility**
3. **Operational Feasibility**

1) Technical Feasibility:

The system can add, change, enhance functionality, features and so on. The technical feasibility is done to check whether the proposed system can be developed with the present equipment manual procedures, existing software technology and available hardware. We have implemented a system using Vite and React with Visual code version **1.86.2** Check software and hardware technology.

2) Economical Feasibility:

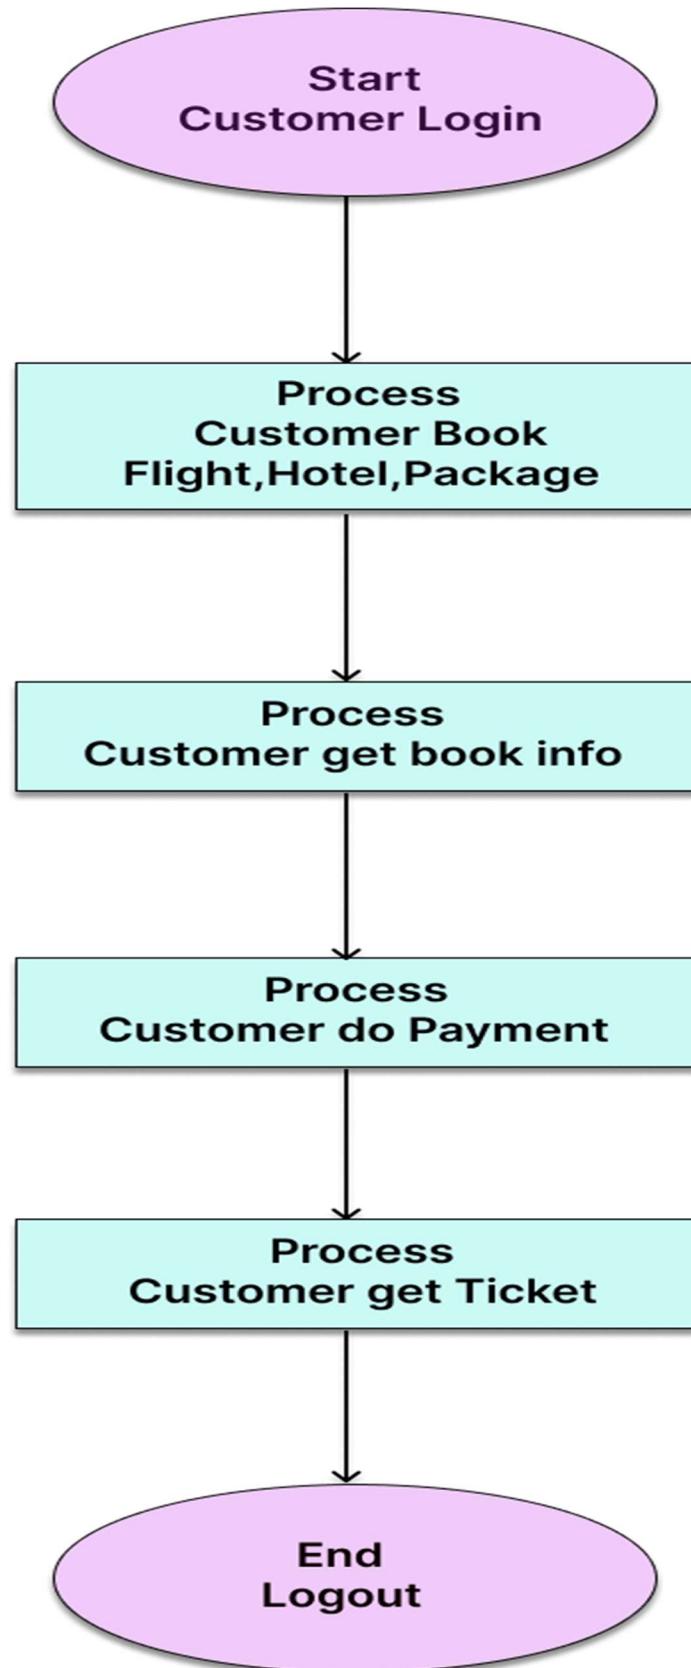

Economical feasibility involves evaluating the cost-effectiveness of implementing the system compared to traditional methods. Our system not only offers reduced servicing costs but also enhances overall efficiency, leading to significant long-term savings for users. Additionally, the system's scalability ensures that potential future expenses remain manageable, further solidifying its economic viability. Furthermore, by automating tedious tasks and optimizing resource allocation, our system frees up valuable time and resources for organizations to focus on strategic initiatives and growth.

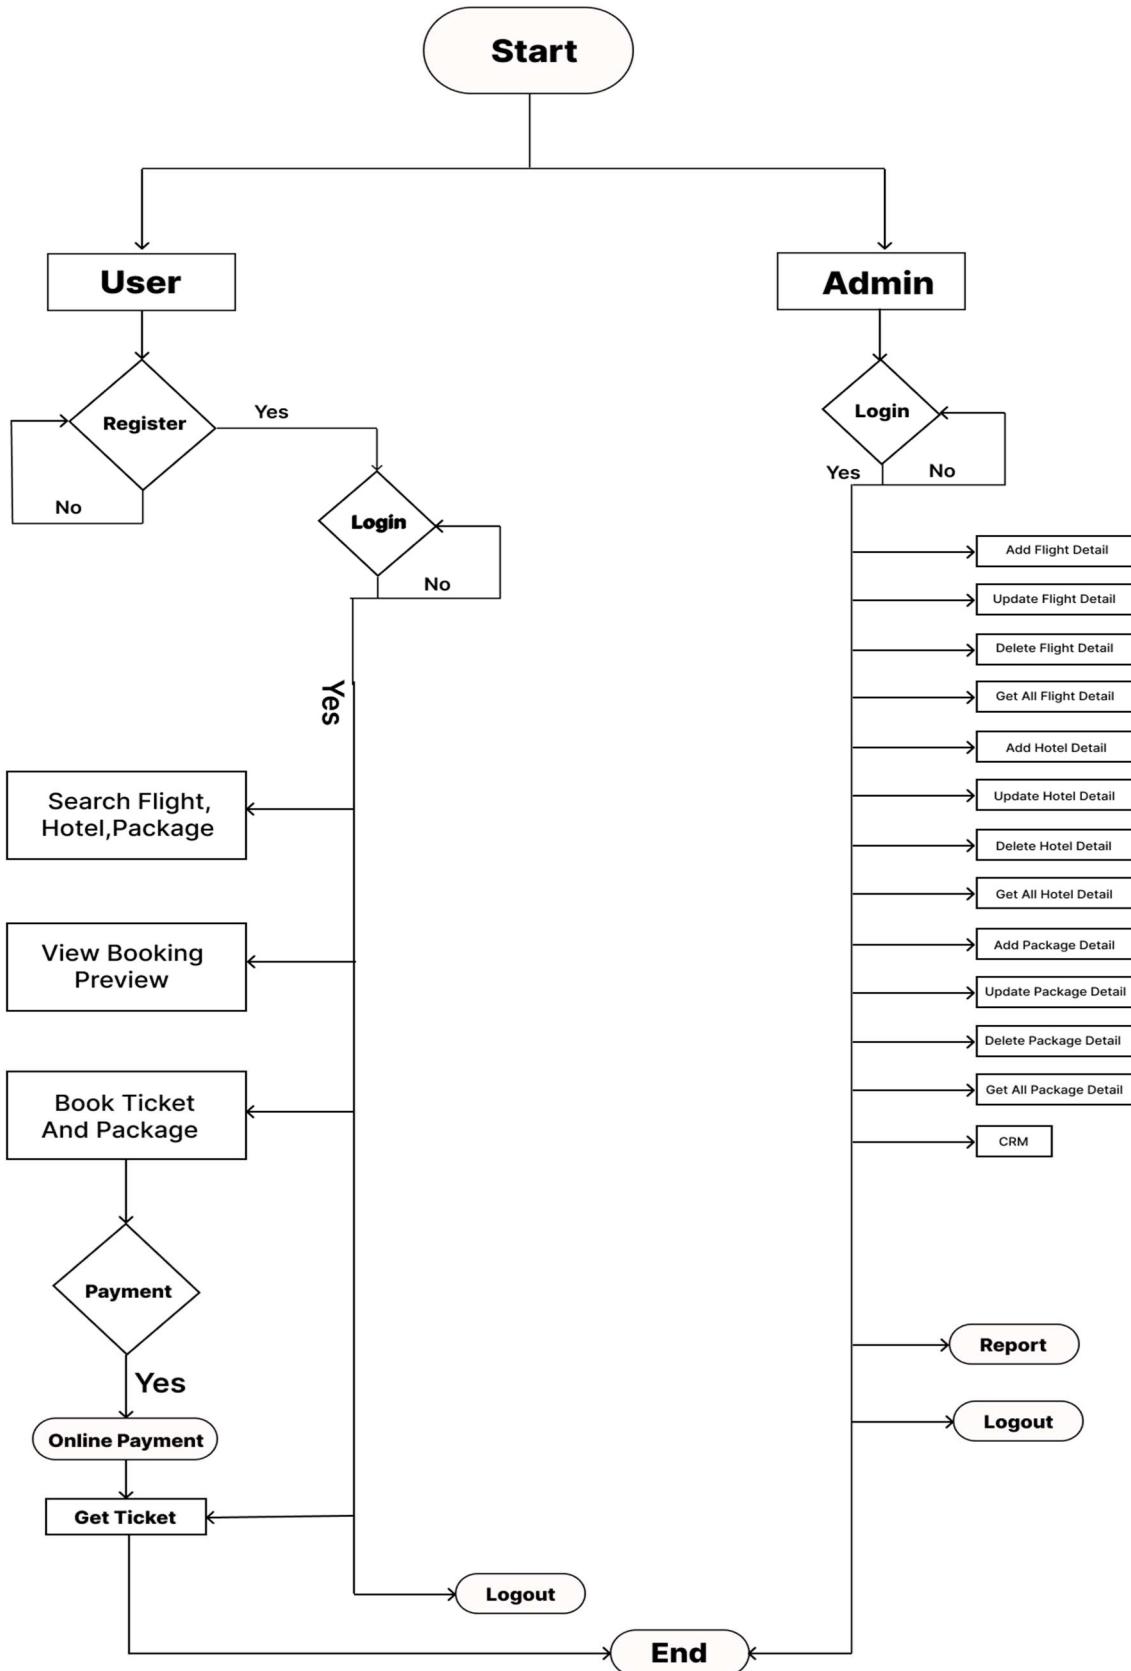

3) Operational Feasibility:

Operational feasibility is used to check whether the project is operationally feasible or not. The operational feasibility is related to organization aspects. User must have internet connectivity required. Our system supports all devices. The installation process is simple. Furthermore, extensive training and support services are provided to users to facilitate a seamless transition to the new system. Regular updates and maintenance ensure that the system remains compatible with evolving technological landscapes, enhancing its long-term operational viability.

Database Screenshots

• OTA Collection

The screenshot shows the MongoDB Compass interface connected to the 'ota' database. On the left sidebar, under the 'ota' database, there are collections: bookedflights, bookedholidays, bookhotels, flights, holidaypackages, hotels, registrations, studentsapi, studentsapimy, and voterdet. The main area displays five collections in cards:

- bookedflights**: Storage size: 20.48 kB, Documents: 20, Avg. document size: 187.00 B, Indexes: 1, Total index size: 36.86 kB.
- bookedholidays**: Storage size: 20.48 kB, Documents: 17, Avg. document size: 245.00 B, Indexes: 1, Total index size: 36.86 kB.
- bookhotels**: Storage size: 20.48 kB, Documents: 15, Avg. document size: 298.00 B, Indexes: 1, Total index size: 36.86 kB.
- flights**: Storage size: 24.58 kB, Documents: 158, Avg. document size: 115.00 B, Indexes: 1, Total index size: 36.86 kB.
- holidaypackages**: Storage size: 20.48 kB, Documents: 35, Avg. document size: 271.00 B, Indexes: 1, Total index size: 36.86 kB.

• Registrations Collection

The screenshot shows the MongoDB Compass interface connected to the 'ota' database, specifically viewing the 'registrations' collection. The left sidebar shows the same collection structure as the previous screenshot. The main area shows the following details for the 'registrations' collection:

- Documents**: 18, **Indexes**: 3.
- ota.registrations** (Collection Name):
- Documents** tab: Shows 18 documents. One document is expanded to show its fields:

```
_id: ObjectId('65954ef5aad5eac31be5fa7bd')
fullName: "kirtan don"
mobileNumber: "9978427943"
email: "ranakirtan9@gmail.com"
password: "KirtanbonSurat@123"
__v: 0
```
- Aggregations**, **Schema**, **Explain Plan**, and **Validation** tabs are also visible.
- Filter**: Type a query: { field: 'value' }
- Actions**: ADD DATA, EXPORT COLLECTION, Reset, Find, More Options.

• Flights Collection

The screenshot shows the MongoDB Compass interface connected to localhost:27017. The left sidebar lists databases and collections, with 'ota.flights' selected. The main pane displays the 'ota.flights' collection, which contains 158 documents. A sample document is shown:

```

_id: ObjectId('659bbde93cba059350e1b4e')
from: "Ahmedabad"
to: "Mumbai"
flightClass: "Economy"
price: 7880

Testing- Test Data, Expected Result and Actual Result

Requirements Traceability Matrix (RTM) For Register

Sr. No	Field	Test Case No	Input	Expected Output	Actual Output	Result
1)	Full Name	TC001	Mistry Dhruvil	User Register Successfully Message	User Register Successfully Message	<input checked="" type="checkbox"/>
		TC002	Ex: Dk	Error (Min - Char 3)	Error (Min - Char 3)	<input checked="" type="checkbox"/>
		TC003	12-@573Dh	Error (Enter valid name)	Error (Enter valid name)	<input checked="" type="checkbox"/>
2)	Phone Number	TC004	8511017102 (10 Digit)	Data Added	Data Added	<input checked="" type="checkbox"/>
		TC005	8511017 (7 Digit)	Error (Req - Num 10)	Error (Req - Num 10)	<input checked="" type="checkbox"/>
		TC006	851101710345 (12 Digit)	Error (Req - Num 10)	Error (Req - Num 10)	<input checked="" type="checkbox"/>
		TC007	0000000000 (10 Zero)	Error (Enter valid number)	Error (Enter valid number)	<input checked="" type="checkbox"/>
3)	Email	TC008	dkmistry02@gmail.com	Data Added	Data Added	<input checked="" type="checkbox"/>
		TC009	dkmistry02@gmail	Error (Enter valid email)	Error (Enter valid email)	<input checked="" type="checkbox"/>
		TC010	@gmail.com	Error (Enter valid email)	Error (Enter valid email)	<input checked="" type="checkbox"/>
4)	Password	TC011	Dhruv02	Data Added	Data Added	<input checked="" type="checkbox"/>
		TC012	dhruv@	Error (Please enter one capital & one special character & number)	Error (Please enter one capital & one special character & number)	<input checked="" type="checkbox"/>
		TC013	@1234567	Error (Please enter one capital & one special character & number)	Error (Please enter one capital & one special	<input checked="" type="checkbox"/>

					character & number)	
	TC014	DHRUVIL	Error (Please enter one capital & one special character & number)	Error (Please enter one capital & one special character & number)	<input checked="" type="checkbox"/>	

Requirements Traceability Matrix (RTM) For Login

Sr. No	Field	Test Case No.	Input	Expected Output	Actual Output	Result
1)	Email	TC001	kppraja02@gmail.com	Data Added	Data Added	<input checked="" type="checkbox"/>
		TC002	kppraja02@gmail	Error (Enter valid email)	Error (Enter valid email)	<input checked="" type="checkbox"/>
		TC003	@gmail.com	Error (Enter valid email)	Error (Enter valid email)	<input checked="" type="checkbox"/>
2)	Password	TC004	Kashyap02	Data Added	Data Added	<input checked="" type="checkbox"/>
		TC005	Kashu@	Error (Please enter one capital & one special character& one number)	Error (Please enter one capital & one special character & one number)	<input checked="" type="checkbox"/>
		TC006	@1234567	Error (Please enter one capital & one special character& one number)	Error (Please enter one capital & one special character & one number)	<input checked="" type="checkbox"/>
		TC007	KASHYAP	Error (Please enter one capital & one special character& one number)	Error (Please enter one capital & one special character & one number)	<input checked="" type="checkbox"/>

Requirements Traceability Matrix (RTM) For Forgot Password

Sr. No	Field	Test Case No	Input	Expected Output	Actual Output	Result
1)	Email	TC001	dkmistry02@gmail.com	Data Added	Data Added	<input checked="" type="checkbox"/>
2)	OTP	TC002	4 Digit	Data Added	Data Added	<input checked="" type="checkbox"/>
		TC003	5 or more than Digit	Error (OTP Must have 4 digit)	Error (OTP Must have 4 digit)	<input checked="" type="checkbox"/>
		TC004	Character (Ex: abcdefg)	Error (enter valid OTP)	Error (enter valid OTP)	<input checked="" type="checkbox"/>
		TC005	Whitespace	Error (enter valid OTP)	Error (enter valid OTP)	<input checked="" type="checkbox"/>
		TC006	1A2BCDEF	Error (enter valid OTP)	Error (enter valid OTP)	<input checked="" type="checkbox"/>
		TC007	!@#\$%^&*()	Error (enter valid OTP)	Error (enter valid OTP)	<input checked="" type="checkbox"/>
		TC008	0000	Error (enter valid OTP)	Error (enter valid OTP)	<input checked="" type="checkbox"/>

		TC009	8888	Error (enter valid OTP)	Error (enter valid OTP)	<input checked="" type="checkbox"/>
		TC010	Negative Number (-9282)	Error (enter valid OTP)	Error (enter valid OTP)	<input checked="" type="checkbox"/>

Requirements Traceability Matrix (RTM) For Change Password

Sr. No	Field	Test Case No	Input	Expected Output	Actual Output	Result
1)	Email	TC001	kppraja02@gmail.com (Read Only)	Data Added	Data Added	<input checked="" type="checkbox"/>
2)	Password	TC002	Kashyap02	Data Added	Data Added	<input checked="" type="checkbox"/>
3)	Confirm Password	TC003	Kashyap02	Data Added	Data Added	<input checked="" type="checkbox"/>
		TC004	Kashyap	Error (Password Must Same)	Error (Password Must Same)	<input checked="" type="checkbox"/>
		TC005	Kp85@#%	Error (Password Must Same)	Error (Password Must Same)	<input checked="" type="checkbox"/>

Requirements Traceability Matrix (RTM) For Flight

Sr. No	Field	Test Case No	Input	Expected Output	Actual Output	Result
1)	From (City)	TC001	Ahmedabad	Data Added	Data Added	<input checked="" type="checkbox"/>
		TC002	Mumbai	Data Added	Data Added	<input checked="" type="checkbox"/>
		TC003	Goa	Data Added	Data Added	<input checked="" type="checkbox"/>
		TC004	Hyderabad	Data Added	Data Added	<input checked="" type="checkbox"/>
		TC005	Delhi	Data Added	Data Added	<input checked="" type="checkbox"/>
		TC006	Not Select	Error (Please select from city)	Error (Please select from city)	<input checked="" type="checkbox"/>
2)	To (City)	TC007	Delhi	Data Added	Data Added	<input checked="" type="checkbox"/>
		TC008	Ahmedabad	Data Added	Data Added	<input checked="" type="checkbox"/>
		TC009	Mumbai	Data Added	Data Added	<input checked="" type="checkbox"/>
		TC010	Goa	Data Added	Data Added	<input checked="" type="checkbox"/>
		TC011	Hyderabad	Data Added	Data Added	<input checked="" type="checkbox"/>
		TC012	Not Select	Error (Please select to city)	Error (Please select to city)	<input checked="" type="checkbox"/>
3)	Date	TC013	23/03/2024	Data Added	Data Added	<input checked="" type="checkbox"/>
		TC014	31/12/2023	Error (Date must be in future)	Error (Date must be in future)	<input checked="" type="checkbox"/>
4)	Seat	TC015	3	Data Added	Data Added	<input checked="" type="checkbox"/>
		TC016	Not Select	Error (Please Select Seat)	Error (Please Select Seat)	<input checked="" type="checkbox"/>
5)	Class	TC017	Economy	Data Added	Data Added	<input checked="" type="checkbox"/>
		TC018	Premium Economy	Data Added	Data Added	<input checked="" type="checkbox"/>
		TC019	Business	Data Added	Data Added	<input checked="" type="checkbox"/>
			Not Select	Error (Please Select Class)	Error (Please Select Class)	<input checked="" type="checkbox"/>

Requirements Traceability Matrix (RTM) For Hotel

Sr. No	Field	Test Case No	Input	Expected Output	Actual Output	Result
1)	City	TC001	Ahmedabad	Data Added	Data Added	<input checked="" type="checkbox"/>
		TC002	Not Select	Error (Please Select City)	Error (Please Select City)	<input checked="" type="checkbox"/>
2)	Check-in Date	TC003	23/03/2024	Data Added	Data Added	<input checked="" type="checkbox"/>
		TC004	01/01/2024	Error (Date must be in future)	Error (Date must be in future)	<input checked="" type="checkbox"/>
3)	Check-out Date	TC005	24/03/2024	Data Added	Data Added	<input checked="" type="checkbox"/>
		TC006	02/01/2024	Error (Date must be in future)	Error (Date must be in future)	<input checked="" type="checkbox"/>
4)	Adult	TC007	1	Data Added	Data Added	<input checked="" type="checkbox"/>
5)	Child	TC008	0 or more	Data Added	Data Added	<input checked="" type="checkbox"/>
6)	Room	TC009	1	Data Added	Data Added	<input checked="" type="checkbox"/>

Requirements Traceability Matrix (RTM) For Holiday Package

Sr. No	Field	Test Case No	Input	Expected Output	Actual Output	Result
1)	City	TC001	Ahmedabad	Data Added	Data Added	<input checked="" type="checkbox"/>
		TC002	Not Select	Error (Please Select City)	Error (Please Select City)	<input checked="" type="checkbox"/>
2)	Date of Travel	TC003	23/03/2024	Data Added	Data Added	<input checked="" type="checkbox"/>
		TC004	01/01/2024	Error (Date of travel must be in future)	Error (Date of travel must be in future)	<input checked="" type="checkbox"/>

Requirements Traceability Matrix (RTM) For Admin Add Flight

Sr. No	Field	Test Case No	Input	Expected Output	Actual Output	Result
1)	From City	TC001	Ahmedabad	Data Added	Data Added	<input checked="" type="checkbox"/>
		TC002	Not Selected	Error (please select from city)	Error (please select from city)	<input checked="" type="checkbox"/>
2)	To City	TC003	Mumbai	Data Added	Data Added	<input checked="" type="checkbox"/>
		TC004	Not Selected	Error (please select to city)	Error (please select to city)	<input checked="" type="checkbox"/>
3)	Class	TC005	Business	Data Added	Data Added	<input checked="" type="checkbox"/>
		TC006	Economy	Data Added	Data Added	<input checked="" type="checkbox"/>
		TC007	Premium Economy	Data Added	Data Added	<input checked="" type="checkbox"/>
4)	Price	TC008	Blank	Error (Please enter price)	Error (Please enter price)	<input checked="" type="checkbox"/>
		TC009	ABCD	Error (Not entering string)	Error (Not entering string)	<input checked="" type="checkbox"/>
		TC010	12999	Data Added	Data Added	<input checked="" type="checkbox"/>

Requirements Traceability Matrix (RTM) For Admin Update Flight

Sr. No	Field	Test Case No	Input	Expected Output	Actual Output	Result
1)	From City	TC001	Goa	Data Added	Data Added	<input checked="" type="checkbox"/>
2)	To City	TC002	Delhi	Data Added	Data Added	<input checked="" type="checkbox"/>

3)	Class	TC003	Business	Data Added	Data Added	<input checked="" type="checkbox"/>
		TC004	Economy	Data Added	Data Added	<input checked="" type="checkbox"/>
		TC005	Premium Economy	Data Added	Data Added	<input checked="" type="checkbox"/>
4)	Price	TC006	9999	Data Added	Data Added	<input checked="" type="checkbox"/>

Requirements Traceability Matrix (RTM) For Admin Delete Flight

Sr. No	Field	Test Case No	Input	Expected Output	Actual Output	Result
1)	Delete	TC001	Alert (Ok)	Data Deleted	Data Deleted	<input checked="" type="checkbox"/>
		TC002	Alert (Cancel)	Data Remain As it Is	Data Remain as It Is	<input checked="" type="checkbox"/>

Requirements Traceability Matrix (RTM) For Admin Add Hotel

Sr. No	Field	Test Case No	Input	Expected Output	Actual Output	Result
1)	Hotel Image	TC001	Image.jpg	Data Added	Data Added	<input checked="" type="checkbox"/>
		TC002	Not Selected	Error (please select hotel image)	Error (please select hotel image)	<input checked="" type="checkbox"/>
		TC003	File Format (pdf, heif, word)	Error (image format will jpg, jpeg, png)	Error (image format will jpg, jpeg, png)	<input checked="" type="checkbox"/>

----	-------	-------	------	------------	------------	-------------------------------------

Requirements Traceability Matrix (RTM) For Admin Delete Holiday

Sr. No	Field	Test Case No	Input	Expected Output	Actual Output	Result
1)	Delete	TC001	Alert (Ok)	Data Deleted	Data Deleted	<input checked="" type="checkbox"/>
		TC002	Alert (Cancel)	Data Remain As it Is	Data Remain As it Is	<input checked="" type="checkbox"/>

Chapter.7

Scopes and Limitations

Scopes:

- User can book Flight, Hotel and Packages and do Payment.
- The Main goal is to improve the better utilization of time for customer.
- Holiday Packages, Hotels, Flight Details are verified by admin.

Limitations:

- Booking Service is Limited to selected city and states.
- Hotel & Packages can be only added by Admin not Agent.

Chapter.8

Future Expansion

- We will expand our web Application state-wise & Country-wise too.
- Add other booking service such as train, car.
- We will include SMS service to Users For OTP.
- Better and latest GUI improvement.
- We can add a new section for distributor to add their packages.
- Also add a new section for hotel to register them on our server.
- We can add a chat-box for the users.
- We can add the feature of sending notification to the customers.

Chapter.9

Reference and bibliography
